AROMA: Earthy, Citrus, Gas

EFFECTS:

Cerebral
Energizing
Euphoria
Focus
Motivation

TESTED THC:

23.8% -
28.57%

The Dirty Mimosa is the brunchy love child of our winning Brunch F1 pheno backcrossed into a Mimosa female that is near and dear to our hearts. Both the Peanut Butter Breath mother (Thug Pug) and the Mimosa (Symbiotic) represented in these crosses are sadly extinct now, making this strain an extra special fossil of some of the most beloved genetics we have worked with over the past decade. They will never be created again, so this is a very limited release of an in-house superstar.

The Dirty Mimosa is a sativa hybrid that boasts an excellent daytime, social effect with none of the buzziness or anxiety of typical sativas. The chunky stacking and limitless frost of its calyxes make it an incredibly eye-catching plant. Expect med-large yields of endlessly stacking, trichome-rich flower. This strain exhibited great stability, an excellent bud-leaf ratio, high density flower, and terpenes reminiscent of a fall apple orchard.
