Milk & Cookies will have you feeling warm, happy and ready to get to sleep, just like a warm cup of milk and freshly baked cookies. Like its name suggests, Milk & Cookies has a super sweet and creamy vanilla flavor with hints of fresh nutty anise. The aroma is very similar, with a nutty cookie overtone that's accented by creamy vanilla and spicy anise. The Milk + Cookies high is just as delicious, with a soothing and calming overtone that will have you feeling kicked back and relaxed for hours on end. You'll feel uplifted with a sense of euphoria that pushes out any negative or racing thoughts immediately. This is accompanied by a growing physical relaxation that creeps into your very bones, leaving you feeling tingly, stimulated and completely at ease.
