AROMA: slight fruit, herbs, ending in pure gas

EFFECTS:

Euphoric
Appetite stimulator
Arousing
Anti-Depressant
Anxiety & PTSD Relief

TESTED THC:

18% - 24.5%

This award winning strain recently took 1st place Indoor in the Caribbean Cup 2023. Pink Gasoline also took 2nd place in the dry sift category in the Biskaia 2020 competition showing her stellar resin properties, so she's sure to be a treat for any hashmakers.

As stated by the breeders, "Pink Gasoline is a cross between our cut of 33 Splitter from uprising seeds and the Peach Ozz reversal. The 33 Splitter is one of our favorite Gelato #33 hybrids that we grew alongside the Jet A. This plant produces some large cola and big amounts of resin. Coming from the Peach Ozz, it creates something very peculiar in terms of aroma.

The terpene profile is very gassy and gelato dominant, with some pleasant OG's undertones coming from the Atom Splitter. When you smell the bud on the plant, it intensely reeks of fuel. It's probably one of the biggest yielder in the Peach Ozz feminized line. The production and the quality of the resin make this strain perfect for all kinds of extractions."

The flavor is of sweet and flowery herbs with a hint of gassy diesel to it, too. The Pink Gas high hits you almost as soon as you exhale, starting with cerebral effects before moving into the body. The most abundant terpene in Pink Gas is myrcene, followed by pinene and caryophyllene.
